Kid Country Child Development Center has been advertising in the Town Planner for the past five years. The Town Planner has been a great asset to us. We have children enrolled in our center now that saw our advertisement in the calendar. Our first few years of business, we advertised in many different areas. We incurred many expenses doing this and didn't see any referrals from most of our advertising. We have kept the Town Planner as our main source of advertising.

Sam DeBona is also another reason we continue to use the calendar. Sam is always there to answer any questions you may have. He works with you to make your advertisement the way you want it to be seen. Sam will also sit and talk with you about the advertising and what has worked for him in the past. Sam is also a great person to just sit down and talk with, you always learn something.

The Town Planner is also a great informative calendar. As a child care based business in Beaver, we appreciate the local school district's yearly calendar. We also use the zip code and the phone number reference frequently, it is much easier than the phone book. The first thing we do when we receive the calendar is look at the pictures and try to figure out where they were taken. We also use the coupons many times a year. We are very happy with the Town Planner and will continue to use it in the years to come.

Sincerely,

Nell Boswell, Owner Kid Country CDC

Jessica Castelli, Director Kid Country CDC
