

March 21, 2006

Mr. DeBona

Thank you for your continued service with The Town Planner Calendar. Since participating in the calendar for several years now it has brought a noticeable increase to the community recognition of our company. Not only do customers come in looking for the calendar at the beginning of each new year but also through out the entire year.

The coupons have been a beneficial way to encourage customers to come into the store so that they can see what we have to offer. We feel the messages on the calendar reminding our customers of important holidays and community events such as proms and graduations also make people more aware of the activities in the township. It is convenient to have our name and phone number listed there saving people from trying to find a florist.

It is our preference to take part in a community based advertising program rather than a large marketing media such as radio or non-local papers. Becoming an established business in a local community always takes time but participating in the Town Planner has been a beneficial way to have our name advertised to the community. Since participating in the calendar we feel that our company has become a well recognized business in the Moon Township area.

Thanks again for your excellent service and we will continue to use the calendar in the future.
