LEANING SERVICES

Dear Terie & Bill,

**Town Planner for me has really relieved a lot of stress in regards to building my business.** Previous to Town Planner I did my own direct mail campaign. When I think of the time & money spent purchasing postcards, renting lists, going to the post office and for what? A 2% retention rate! That means 98% was going down the drain.

**With the Town Planner I know that my business is hanging up 365 days a year in thousands of homes in my local community.** Keeping my advertising in front of potential clients and out of the trash can. Which gives me more time to run my business. To know that I am being advertised and I am not having to physically mail or pass out flyers is awesome!

On a personal note, **I use the Town Planner faithfully everyday** to schedule appointments as well as other things I need to get done. Both my husband and I love the coupons and refer to the Town Planner often for savings from local businesses. If we are doing this I am sure others in our community are as well.

**Recently I received a referral** from a woman at the daycare where I take my children. At a local gym where she works out she noticed that who ever was cleaning the facility was not doing the best job. So when she complained they asked her if she new anyone who provides that service. She said **she remembered me because the Town Planner was hanging in her kitchen.** So she went home and got my number to give to them!

Working with you both is like having extended family. I must say that after getting to know you both I feel like I belong in Atlanta. **Working with you has given me the feeling that I can do anything, go anywhere, and I feel so motivated about my business.** I have happily renewed for next year and look forward to working together for years to come

**I would highly recommend the Town Planner** to any business owner who is looking for a better, more cost effective, and time efficient form of advertising!

Sincerely,

Camille Pollard
