I would like to take this chance to say thank you. We have never had an add campaign work so well for us, we received 16 coupons back in the first quarter. The number we received back in one quarter was what I had hoped for the entire year. I will be recommending Town Planner to all of my business friends and would recommend it as a very strong tool for helping to grow your business. I, once again, can not believe how well this worked and when I compare cost against income I can only say that this has paid for its' self four times so far. I continue to get these coupons, many from new clients, weekly. This campaign continues to create new sales and income opportunities for our business, thank you very much!
